Think Global PBL-Academy

Maximize U
MAXIMIZE POTENTIAL AND CUSTOMIZE LEARNING

The United Arab Emirates

ARIE and Maximize U are coming to the UAE!

What sets ARIE's training apart from all others is our personal knowledge and experience gained over **almost two decades** of 100% PBL implementation at two 100% PBL campuses: Manor New Technology High School and Cedars International Next Generation High School.

This three day event will start from ground zero and prepare any teacher to become PBL ready for the classroom.

DAY ONE - Participants are launched into the world of Project Based Learning (PBL), reviewing evidence of the model's success and the need for its successful implementation in a 21st Century classroom. Project ideation and standards- centered rubrics are covered in detail, providing the foundation for the participants' personal projects that will be constructed over the next three days.

DAY TWO - Successful projects actively engage students with research and project workdays. Today, participants discover how to scaffold these activities and learn how to incorporate both traditional and nontraditional assessments to determine student mastery of concepts and skills to close the achievement gap. Participants will also explore how to engage students with Entry Events, the hook that first introduces a project to a new audience.

DAY THREE - Today, participants acquire tools to successfully run collaborative student groups and manage projects through completion. Participants then share their personally created projects to a panel of peers and experts for constructive feedback, learning the expectations for students presentations. A final, meaningful reflection then provides next steps to successfully implement the created projects upon return to the participant's home campus.

Global Impact

Our veteran team of practicing PBL gurus journey around the world to teach fellow educators. [Click here](#) to see where we have helped facilitate a pedagogical shift.

Testimonials

We find inspiration in the enthusiasm and excitement of our participants. [Click here](#) to see some of the wonderful things said about recent Think Global PBL Academies.

Recognized

[President Obama recognized our success and innovation when he visited Manor New Technology High School, where our trainers first became classroom PBL practitioners.](#)
